

WELL21 ---Central water purifier

Enjoy purified water life in entire house !

New proposition 1 for purified water of 21 centuries

■ Easy home beauty salon using purified water

For example, anyone have experiences being dry and stiff hair after swimming in the pool ? In fact, influence of "chlorine" used for a swimming pool seems to be big. Therefore it is a point of condition up that use soft purified water directly touching skin as shower or bath. Enjoy bath-time with soft purified water. Condition improves rapidly just to use it every day. It is right the home beauty salon of a dream.

New proposition 2 for purified water of 21 centuries

■ Distinguished economy

I buy bottled water for drinking water and use a water purifier. I spend plenty money for water thinking carefully. The WELL series copes with water of the whole house for only 83 yen a day!! Get purified water of the whole house with for about 1 liter bottled water. I do not have being satisfied only with drinking water, for beauty, family, hobby and health. This is real luxury to be able to fully use gentle water.

- for example, assuming that I use 2 liters bottled water every day, bottled water (100 Yen) $\times 2 \ell \times 30 \text{ day} =$ about 6000 Yen a month are required.

New proposition 3 for purified water of 21 centuries

■ Simple connection

Because I get off with simple construction only for one place outside house, from the day I can change all water into kind water to use by life to bathing, shower, gardening, water for pets not to mention drinking water and cooking.

Fiber-shaped activated carbon removes chlorine powerfully.

It removes chlorine powerfully, and supply water that reduced irritation for those who are afflict with allergy and atopic dermatitis. "WELL21 and WELL PRO"

purify all water in home at one time. We suggest purified water to all water used in every scene of life, such as drinking water, cooking, washing-up, bathing, shower, washing face, water for gardens and for pets.

WELL21 (for detached houses)

Be installed in one place even at detached houses or condominiums, purified water come out of all faucets of houses. Because nothing is installed in faucets, you can use kitchen space effectively.

By one purifier the tap water of your home roundly every becomes the clean water !

The cartridge of Osaka Gas Chemicals Co., Ltd. make is loaded.

Space-saving design

Maximum processing quantity of water 400t (MB400R / G400N)

WELL21 / WELL PRO Central Water Purifier System

The rain got off in the top of the mountain and took time to become the spring water in hint, researched the clean water of the natural world, and the supply mechanism of the water, we developed in order for purified water to come out of all faucets.

Fiber-shaped activated carbon and four kinds of ceramics

It removes chlorine powerfully by fiber-shaped activated carbon, and purifies water. Because pressure loss was small in comparison with conventional granulated active carbon, and because of processing capacity of about 5 times, the central system that large throughput was needed with large flow became possible. In addition, the water becomes mellow with four kinds of ceramics.

Processing capacity more than before even if is small

The processing capacity of fiber-shaped activated carbon is 400t. It exceeds sufficiently the average of water, 330t, which four general families use for one year.

Chlorine density change possibility by adjusting of bypass valve

As a structural feature, the bypass valve for raw water fill is provided. Using it by the bypass valve open, it is possible to leave chlorine to the processing water.

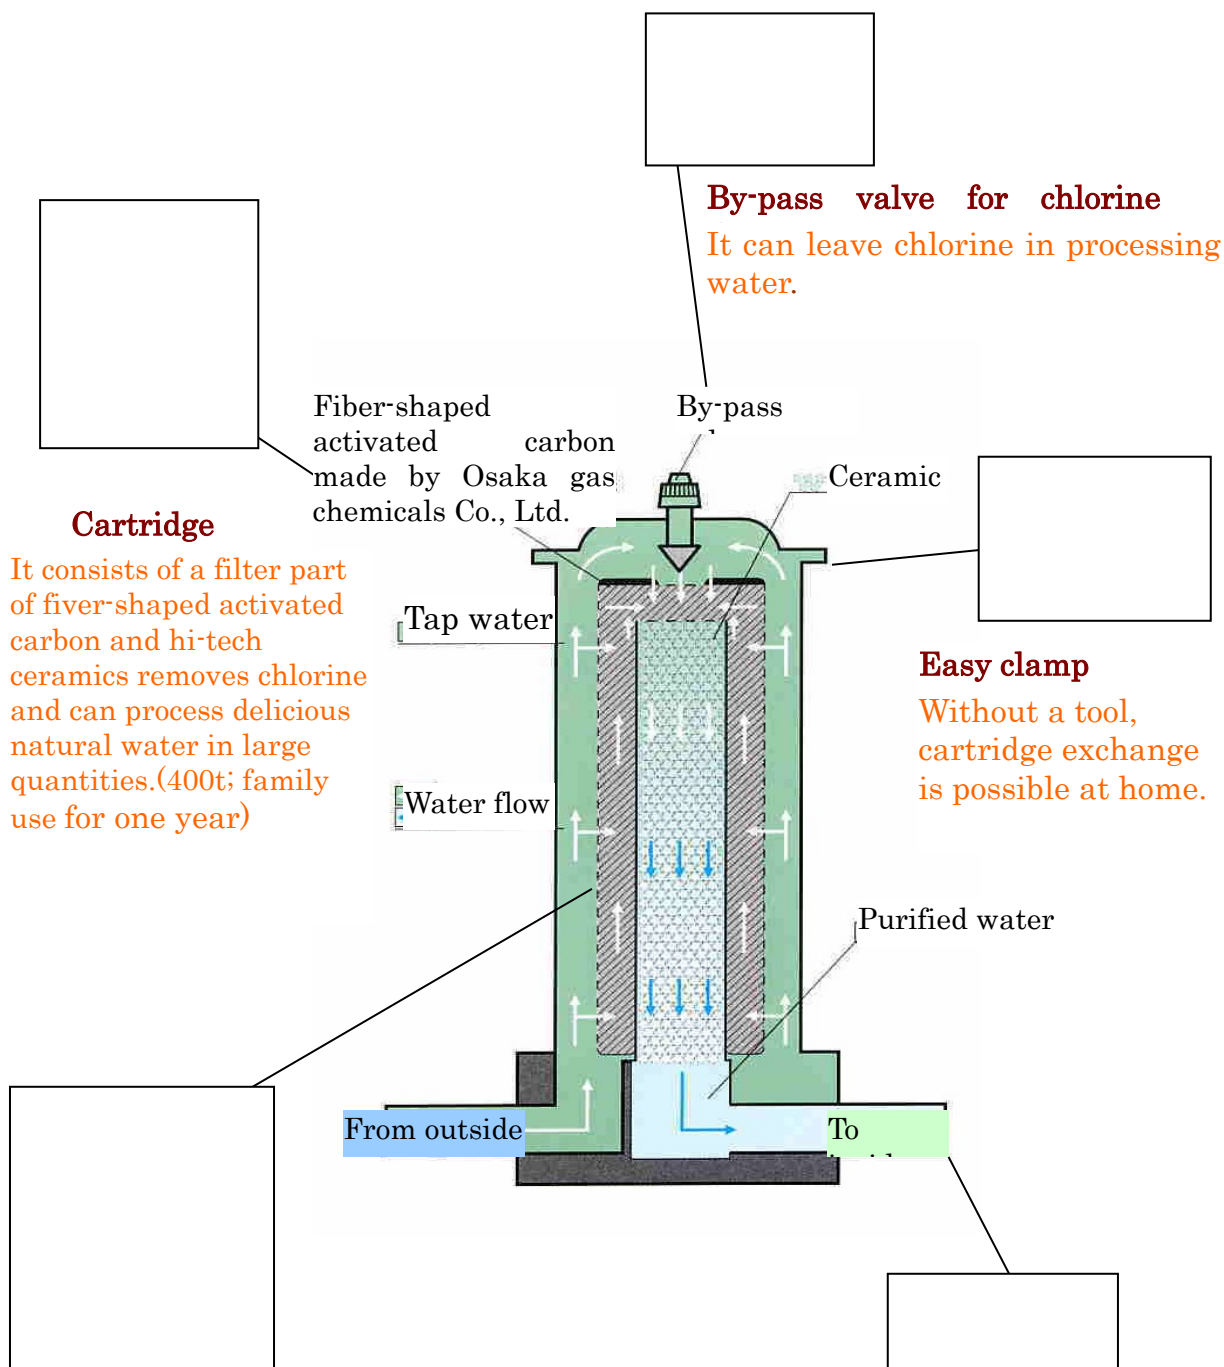

Filter exchange is just one time in year

Identification; we manage the registration of customers with ID number

Please confirm an ID number stated in the guarantee verification. With secure cooperation of the store and the agency, we take the secure system to be able to perform quickly and certainly all managements of safety, cleanliness and handling.

After Follow; consultation correspondence from customers

Consultation from the customer 24 hour receives corresponds with the free dial.

Cartridge

It consists of a filter part of fiber-shaped activated carbon and hi-tech ceramics removes chlorine and can process delicious natural water in large quantities.(400t; family use for one year)

By-pass valve for chlorine

It can leave chlorine in processing water.

Easy clamp

Without a tool, cartridge exchange is possible at home.

Turbidity

It prevents blocking of a cartridge and largely lengthens filter lifetime.

You can change a cartridge without cutting off water supply. It can change to bypass side (tap water) and can change. In addition, it can supply raw water by emergency.
